

SUMMARY

Foreword	III
----------------	-----

PART 1 DIAGNOSTIC APPROACH

■ Red blood cell disorders

Microcytosis and microcytic anaemia.....	5
Macrocytosis and macrocytic anaemia.....	19
Normocytic regenerative anaemia.....	37
Non-microcytic regenerative anaemia and hyperchromia	47
Polycythaemia	69

■ Platelet disorders

Thrombocytopenia.....	83
Thrombocytosis	113

■ Leukocyte disorders

Neutropenia	125
Neutrophilia	145
Monocytopenia	153
Monocytosis.....	159
Lymphopenia.....	167
Lymphocytosis	181
Eosinophilia	201
Basophilia	219
Circulating erythroblasts and neutrophil precursors	225
Bicytopenia and pancytopenia.....	231
Circulating blast cells	241

PART 2 MAIN BLOOD DISORDERS

■ Constitutional disorders

Alpha-thalassaemia.....	257
Beta-thalassaemia.....	259
Blackfan-Diamond anaemia.....	261
Congenital sideroblastic anaemia.....	262
G6PD deficiency.....	264
Haemoglobin C disease.....	266
Haemoglobin E disease.....	268
Hereditary elliptocytosis.....	270
Hereditary spherocytosis.....	272
Hereditary stomatocytosis.....	274
MYH9-related disorders.....	276
Sickle-cell disease.....	278
Southeast Asian ovalocytosis.....	280

■ Myeloid blood disorders

Acute myeloid leukaemia.....	283
Aplastic anaemia.....	290
Atypical chronic myeloid leukaemia.....	293
Chronic myeloid leukaemia.....	295
Chronic myelomonocytic leukaemia.....	298
Chronic neutrophilic leukaemia.....	301
Essential thrombocythaemia.....	303
Hypereosinophilic syndrome.....	305
MDS/MPN with ring sideroblasts and thrombocytosis.....	308
Myelodysplastic syndrome.....	310
Polycythaemia vera.....	314
Primary myelofibrosis.....	316

■ Lymphoid blood disorders

Acute lymphoblastic leukaemia.....	321
Adult T-cell leukaemia-lymphoma.....	324
Angioimmunoblastic T-cell lymphoma.....	326
B-cell prolymphocytic leukaemia.....	328
Burkitt's lymphoma.....	330
Chronic lymphocytic leukaemia.....	332
Follicular lymphoma.....	336
Hairy cell leukaemia.....	338

Large granular lymphocytic leukaemia	340
Marginal zone lymphoma	342
Mantle cell lymphoma	344
Multiple myeloma	346
Sézary syndrome	350
T-cell prolymphocytic leukaemia	353
Waldenström macroglobulinemia	355

■ Other

Autoimmune erythroblastopenia	361
Extensive bone marrow necrosis	363
Gelatinous transformation of bone marrow	365
Haemophagocytic lymphohistiocytosis	366
Immune thrombocytopenic purpura	368
Infantile pyknocytosis	371
Metastasis from solid tumour	372
Thrombotic microangiopathy	374

PART 3 QUICK-REFERENCE LISTS

Monitoring of medicinal products	381
Pre-analytical and analytical	393
Morphological abnormalities	401
Immunophenotype abnormalities	409
Genetic abnormalities	419
References	427
Abbreviations	431
Acknowledgements	435
